BlueOrange Compliance has been providing cybersecurity solutions since the inception of HITECH.

This team of top former healthcare IT executives and analysts are at your service with expertise in healthcare information security, physical security, cybersecurity, regulatory compliance, business continuity, disaster recovery, pen testing, and more.

BlueOrange really understands the standards, the risks, and the long-term care industry very well, so they can help guide us in getting closer and closer to perfection every single year.

David Finkelstein, RiverSpring Living CIO

Key Services

Our security assessments are NIST CSF 2.0-based and meet HIPAA Security Rule criteria. After the assessment, we compose a tailored plan based on our findings. Your team will be given access to an interactive, prioritized action plan that facilitates an efficient path forward to compliance.

HIPAA Security Risk Assessment (SRA)

Human capital is limited. You need high-tech, low-touch, and cost-effective information and guidance to stay ahead of the latest cyber risks. With minimal staff time and engagement, we can help you develop the implementation and training programs to prepare for everyday security considerations.

BENEFITS OF A HIPAA SRA

- ✓ **Comply with laws and regulations**
- ✓ **Protect assets and reputation**
- ✓ **Fulfill cyber liability insurance requirements**
- ✓ **Keep all sensitive information secure**
- ✓ **Avoid noncompliance penalty costs**
- ✓ **Answer RFP questionnaires**

Penetration Testing

Protect against the increasing risk of cyberattacks. Our BlueOrange experts, Offensive Security Certified Professionals, will search for vulnerabilities in the network you work tirelessly to protect.

CHOOSE AN AREA OF FOCUS

Internal Network

The perspective of someone who has plugged a device into the corporate network.

External Network

Anyone with internet service trying to access your system resources.

Phishing

Phishing campaigns and any other cyber threats targeting your active users directly.

Web Application

Those attempting to obtain privileges, data, and system access through an app.

Cloud

A remote attack targeting a cloud environment, internet-accessible resources, systems, and people

ABOUT CLOUDWAVE

CloudWave is a full-service cybersecurity and cloud services provider built exclusively for healthcare. Protecting over 350 hospitals and health system environments, CloudWave delivers end-to-end solutions that combine secure hosting, IT operations, and 24/7 threat detection and response. Services include managed security, risk and compliance, disaster recovery, systems management, and cloud optimization—all delivered with a healthcare-first mindset. Powered by AI-driven security operations and supported by U.S.-based Network and Cybersecurity Tactical Operations Centers, CloudWave provides a cyber-ready foundation for safe, uninterrupted patient care.

ABOUT BLUEORANGE COMPLIANCE

BlueOrange Compliance, a CloudWave company, is a leader in information privacy and security, regulatory compliance, and risk management services. Together with CloudWave, BlueOrange Compliance delivers end-to-end cybersecurity solutions for healthcare organizations facing increasingly complex compliance landscapes, including HIPAA, HITECH, OCR, and other industry-specific regulations.

The combination of our proven track record in compliance audits, risk assessments, cybersecurity testing and training, and cybersecurity consulting and risk management services along with CloudWave's advanced threat detection, incident response, and cloud infrastructure capabilities results in a comprehensive set of offerings that empower healthcare organizations to secure sensitive data, streamline compliance efforts, and mitigate evolving cyber threats.
